Professional Summary

Enthusiastic and proactive DevOps Engineer with hands-on experience in AWS cloud infrastructure, Docker containerization, Kubernetes orchestration, Terraform IaC, CI/CD pipelines, and DevSecOps practices. Skilled in building scalable systems, implementing monitoring solutions with Grafana, and performing offensive security testing. Eager to contribute automation expertise, reliability focus, and fresh cloud-native perspective to a dynamic DevOps or Platform Engineering team.

Skills

Cloud & IaC: AWS, Terraform, Docker, Kubernetes, GitOps (ArgoCD)

CI/CD & Tools: GitHub Actions, Jenkins, Linux, Grafana, Prometheus, Nginx

Security: DevSecOps, Vulnerability Assessment, Reconnaissance, Red Teaming Basics

Others: Infrastructure as Code, Observability, Networking, Bash, Git

Projects

- **DevSecOps CI/CD Pipeline TaskFlow 3-Microservice Web App (AWS ECS Fargate)** Apr 2026
 - Designed & implemented a complete security-first DevSecOps pipeline for a realistic 3-microservice application (React frontend + Node.js auth & tasks services) using GitHub Actions, Terraform, Trivy, OWASP Dependency Check, and SonarQube.
 - Automated zero-touch CI → CD workflow with 'workflow_run' chaining that builds, scans, pushes Docker images to Docker Hub, and deploys to AWS ECS Fargate in under 8 minutes with zero downtime.
 - Enforced shift-left security and policy-as-code, achieving 100% deployment compliance, catching critical vulnerabilities pre-production, and delivering full observability via AWS CloudWatch Logs + Container Insights.
GitHub Repo | LinkedIn Project
- Developed and deployed multiple AWS Serverless applications with full CI/CD pipelines using Terraform, Docker, GitHub Actions, Lambda, API Gateway, S3, and DynamoDB, resulting in automated, cost-efficient, and reproducible environments.
- Created complete DevOps pipelines for web applications (Weather Dashboard, Notes App, Todo App) with Docker, Jenkins, GitHub Actions, and AWS achieving consistent builds, automated testing, and reliable deployments.
- Regularly publish technical threads and blogs on DevOps topics including CI/CD, Kubernetes, Terraform, and Platform Engineering to document learning and help fellow freshers.

Experience

Content Creator (Tech & DevOps)

Aug 2025 – Present

X (Twitter) @Abdulraheem183

Gujrat, PK

- Created and consistently posted technical threads and insights on DevOps, cloud engineering, CI/CD pipelines, Docker, Kubernetes, and Terraform to build personal brand in the tech community.
- Published multiple DevOps-focused blog posts covering practical implementation of tools and best practices for freshers and professionals.
- Documented personal projects and learning journey publicly, increasing visibility among recruiters and Islamabad/remote tech teams.

Cyber Security Intern

Sploitec

Mar 2025 – June 2025

Islamabad, PK (Remote)

- Conducted full red team reconnaissance, vulnerability scanning, and offensive security testing on company web applications to identify critical security weaknesses.
- Performed network scanning, exploitation testing, and detailed bug reporting, directly contributing to risk identification and mitigation strategies.
- Delivered comprehensive vulnerability reports with remediation recommendations, supporting business continuity planning and strengthening organizational security posture.

Education

Computer and Information Sciences

PiPS - Gujrat

Feb 2024 – Present

Gujrat, PK

- Relevant Coursework: Cloud Computing, Networking, Programming, Databases, and Linux Systems.
